

- Company with public capital
- 42 years of history
- 32 entities involved
- 8 subsidiary companies
- 280 employees

Our strengths:

Water, Energy, Hygiene Environment, Mobility, Renewable Sources and Social

Our goals

To promote, in a structured and widespread way, the use of electric vehicles as a daily experience

To develop the first suburban network of recharging stations for electric vehicles in order to promote electric mobility

To encourage new forms of tourism, inspired by the European countries where this type of mobility is already widespread

To use energy exclusively from renewable sources for recharging vehicles, for sustainability 100% Green
